

Grampian Business Finder Member Verification

Grampian Business Finder is an impartial verification site that pre verifies Member businesses are real with public liability and/or indemnity insurance in place (employers' liability by employers is required by law).

To become verified we require:

- Either companies house or VAT number, or ITR document for sole traders, to evidence that Member businesses are real.
- Public liability and or indemnity insurance documents.
- Adherence to the Grampian Business Finder Values.

Qualifications and certifications are not a requirement in every industry. For Finders' added peace of mind though, Members listings have a section for Qualifications, Certificates and Awards which may also be uploaded into Members photo carousels (with private identifying information removed).

If a business format changes during Membership rendering the evidence previously provided invalid, the Member is required to provide Grampian Business Finder with updated validation as soon as this is available to avoid their Member listing being hidden.

Finders please undertake due diligence when choosing your provider, this can include looking at their reviews here and on other online platforms, asking for testimonials, checking out portfolios of previous work they have done or contacting their previous customers.

Grampian Business Finder does not guarantee our Members quality, but the Members may provide guarantees to you under your agreement with them.
